- * Flask
- * ASP.NET
- * HTML
- * CSS

EXPERIENCE

HOMELESS EMPOWERMENT PROGRAM THRIFT STORE

04/14 — Current

Created programs, web applications, and spreadsheets to increase efficiency in Thrift Store operations.

- * A change calculator written in Python to keep track of change in the Cash Office.
- * A web application using Python, Flask, and SQLAlchemy designed to automate scheduling of deliveries and pickups.
- * Improved cash reconciliation form to be more readable and reduce errors in end-of-day money handling.

GOODWILL INDUSTRIES-SUNCOAST

05/09 – 04/14

Priced clothing and ran customer transactions via check, credit card, or cash.

PROJECT EXPERIENCE

BLOGZ

Multi-user blog written using Python and Flask.

Link: <https://github.com/margaretlillian/blogz>

WEB CRYPTO

Fun program to create secret messages using the Caesar and Vigenere ciphers.

Link: <https://github.com/margaretlillian/web-crypto>

EDUCATION

LaunchCode LC101 is a course designed to teach students the fundamentals of coding, and is taught in Python and C#.
